BagTools®
Essential accessories

A complete range of accessories for a safe and efficient laboratory work.
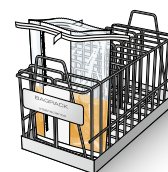

BagRack®
Bag holder

BagRack® allows a clean storage of your bags. You can let the bags open for easy pipeting or close it with BagClip®.

3 models: 100 ml, 400 ml and 3500 ml

Option: DripTray® 400 security driptray in case of liquid leak, for hygiene and cleanliness.

BagOpen®
Bag opener/holder

BagOpen® allows an easy opening of the bag without contact with the sample. Ideal tool for laboratory manipulations.
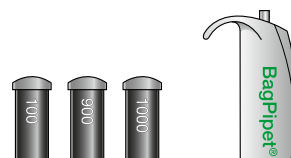

3 models: 100 ml, 400 ml et 3500 ml

Thanks to BagOpen®, pipeting sample is quick and easy.

BagPipet® & BagTips®
Pipet and sterile tips

BagPipet® pipets fixed chosen volumes (0.1 ou 0.9 ou 1 ml). Used with a BagTips®, one-use sterile straws, easy to eject, BagPipet® allows the pipeting of all products, even viscous, with no blocking risks.

BagPipet® is particularly adapted to viscous and food samples pipeting, after blending in a BagFilter® filter bag with a BagMixer® blender.

ambifood

BagClip®
Closing clip

BagClip® close by pinching any kind of bags, allowing a perfectly tight closing thanks to its three points closing system. BagClip® is trademarked.

3 models: 100 ml, 400 ml et 3500 ml

Thanks to its quick and perfectly tight closing, with BagClip® you can store your samples in a BagRack® in a secured way.

Petripile®
Petri dishes storage stack

PetriPile® allow you to manipulate and transport in a secured manner all your Petri dishes. Petripile is designed for 36 dishes (16 dishes for the 150 mm Petripile®).

4 models: Ø 55 / 65 / 90 / 150 mm

Stainless steel designed, stackable and autoclavable, PetriPile® is ideal for incubator loading, according to AFNOR NF V 08-002 standard.
