NEOSPORA CANINUM

ID Screen® Neospora caninum Indirect Multi-species

Indirect multi-species ELISA kit for the detection of anti-*Neospora caninum* antibodies in serum or milk.

- **Cost-effective** method for disease monitoring, with high specificity and sensitivity
- **Fast and convenient protocol** with results in 90 minutes and protocols for both serum and milk samples
- **Applicable to multiple species**, including ruminants and dogs.
- **The stop solution no longer contains H₂SO₄**, meaning that it is less corrosive

Specifications

Method	Indirect ELISA
Species	Multiple species, including ruminants and dogs.
Specimens	Serum, plasma or milk
Coated antigen	Purified <i>Neospora caninum</i> extract
Conjugate	Anti-multi-species IgG –HRP conjugate (concentrated 10X)

Ordering information

Product code	NCS-MS-2P	NCS-MS-5P
Kit format	2 plates	5 plates
Reactions	192	480
Plate format	12 x 8-well strips

Associated Products

N. caninum positive freeze-dried serum

Product Code	MRI-NC
Format	0.5 ml vial (freeze-dried)
Description	Freeze-dried positive bovine serum to be used as internal reference material for quality control

Negative bovine freeze-dried serum

Product Code	MRINEG-BOV
Format	1 ml vial (freeze-dried)
Description	Negative freeze-dried bovine serum to be used as internal reference material for quality control.
